CONTENTS OF VOLUME 92

NUMBER 1, JANUARY 1988

LOIS D. LEHMAN-MCKEEMAN, GLEN K. ANDREWS, AND CURTIS D. KLAASSEN. Mechanisms of Regulation of Rat Hepatic Metallothionein-I and Metallothionein-II Levels following Administration of Zinc 1

LOIS D. LEHMAN-MCKEEMAN, GLEN K. ANDREWS, AND CURTIS D. KLAASSEN. Ontogeny and Induction of Hepatic Isometallothioneins in Immature Rats 10

KIM BOEKELHEIDE. Rat Testis during 2,5-Hexanedione Intoxication and Recovery. I. Dose Response and the Reversibility of Germ Cell Loss 18

KIM BOEKELHEIDE. Rat Testis during 2,5-Hexanedione Intoxication and Recovery. II. Dynamics of Pyrrole Reactivity, Tubulin Content, and Microtubule Assembly 28

M. K. JOHNSON, J. L. WILLEMS, H. C. DE BISSCHOP, D. J. READ, AND H. P. BENSCHOP. High Doses of Soman Protect against Organophosphorus-Induced Delayed Polyneuropathy but Tabun Does Not 34

EUGENE H. HERMAN, ANTOINE EL-HAGE, AND VICTOR J. FERRANS. Protective Effect of ICRF-187 on Doxorubicin-Induced Cardiac and Renal Toxicity in Spontaneously Hypertensive (SHR) and Normotensive (WKY) Rats 42

DIANE M. BLACKBURN, ANDY J. GRAY, SARA C. LLOYD, CHRISTOPHER M. SHEARD, AND PAUL M. D. FOSTER. A Comparison of the Effects of the Three Isomers of Dinitrobenzene on the Testis in the Rat 54

WILLIAM ROTH, RICHARD VOORMAN, AND STEVEN D. AUST. Activity of Thyroid Hormone-Inducible Enzymes following Treatment with 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin 65

ANTHONY P. DECAPRIO, ROBERT G. BRIGGS, STEPHEN J. JACKOWSKI, AND JAMES C. S. KIM. Comparative Neurotoxicity and Pyrrole-Forming Potential of 2,5-Hexanedione and Perdeuterio-2,5-Hexanedione in the Rat 75

JOSEPH O. OWASOYO, MICHAEL JAY, AND MARK N. GILLESPIE. Impact of Nicotine on Myocardial Neutrophil Uptake 86

LOUIS E. SENDELBACH AND CURTIS D. KLAASSEN. Kidney Synthesizes Less Metallothionein than Liver in Response to Cadmium Chloride and Cadmium-Metallothionein 95

J. ODUM, T. GREEN, J. R. FOSTER, AND P. M. HEXT. The Role of Trichloroacetic Acid and Peroxisome Proliferation in the Differences in Carcinogenicity of Perchloroethylene in the Mouse and Rat 103

DAVID L. BUNNER AND ELENA R. MORRIS. Alteration of Multiple Cell Membrane Functions in L-6 Myoblasts by T-2 Toxin: An Important Mechanism of Action 113

NARAYAN S. PARMAR, MOHAMMAD TARIQ, AND ABDULREHMAN M. AGEEL. Gastric Anti-Ulcer and Cytoprotective Effect of Selenium in Rats 122

RAIMO POHJANVIRTA, RISTO JUVONEN, SIRPA KÄRENLAMPI, HANNU RAUNIO, AND JOUKO TUOMISTO. Hepatic Ah-Receptor Levels and the Effect of 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin (TCDD) on Hepatic Microsomal Monooxygenase Activities in a TCDD-Susceptible and -Resistant Rat Strain 131

HAJAR SOUHAILI-EL AMRI, XAVIER FARGETTON, ETIENNE BENOIT, MURIEL TOTIS, AND ANNE-MARIE BATT. Inducing Effect of Albendazole on Rat Liver Drug-Metabolizing Enzymes and Metabolite Pharmacokinetics 141

SHORT COMMUNICATION

R. N. SCHOP AND M. T. GOLDBERG. Nongenotoxicity of Minoxidil in Murine Hair Follicles as Determined by the Nuclear Aberration Assay 150

ANNOUNCEMENT 155

NUMBER 2, FEBRUARY 1988

LINDA M. DE WITT, THOMAS W. JONES, AND LEON MOORE. Stimulation of the Renal Endoplasmic Reticulum Calcium Pump: A Possible Biomarker for Platinate Toxicity 157

VALERIE L. SLOTT AND BARBARA F. HALES. Role of the 4-Hydroxy Intermediate in the *in Vitro* Embryotoxicity of Cyclophosphamide and Dechlorocyclophosphamide 170

PETER L. GOERING, ROBERT R. MARONPOT, AND BRUCE A. FOWLER. Effect of Intratracheal Gallium Arsenide Administration on δ-Aminolevulinic Acid Dehydratase in Rats: Relationship to Urinary Excretion of Aminolevulinic Acid 179

TAKEMI YOSHIDA, TAKIKO OGURO, SATOSHI NUMAZAWA, AND YUKIO KUROIWA. Effect of Diethyl Maleate on Hepatic Ornithine Decarboxylase 194

LESLEE D. BROWN, DIANE E. WILSON, AND JAMES D. YARBROUGH. Alterations in the Hepatic Glucocorticoid Response to Mirex Treatment 203

MARION EHRICH, BERNARD S. JORTNER, AND W. BURNHAM GROSS. Types of Adrenocorticoids and Their Effect on Organophosphorus-Induced Delayed Neuropathy in Chickens 214

PATRICIA M. RODIER AND BARBARA KATES. Histological Localization of Methylmercury in Mouse Brain and Kidney by Emulsion Autoradiography of ^{203}Hg 224

PATRICIA M. RODIER, BARBARA KATES, AND RICHARD SIMONS. Mercury Localization in Mouse Kidney over Time: Autoradiography versus Silver Staining 235

J. G. LEWIS, BETH ODOM, AND D. O. ADAMS. Toxic Effects of Benzene and Benzene Metabolites on Mononuclear Phagocytes 246

PETER A. VAN VELD, JOHN S. PATTON, AND RICHARD F. LEE. Effect of Preexposure to Dietary Benzo[*a*]pyrene (BP) on the First-Pass Metabolism of BP by the Intestine of Toadfish (*Opsanus tau*): *In Vivo* Studies Using Portal Vein-Catheterized Fish 255

L. EARL GRAY, JR., JOHN M. ROGERS, JOSEPH S. OSTBY, R. J. KAVLOCK, AND JANET M. FERRELL. Prenatal Dinocap Exposure Alters Swimming Behavior in Mice Due to Complete Otolith Agenesis in the Inner Ear 266

J. STILES AND W. S. TYLER. Age-Related Morphometric Differences in Responses of Rat Lungs to Ozone 274

JAMES G. OMICHINSKI, ERIK J. SODERLUND, ERIK DYBING, PAUL G. PEARSON, AND SIDNEY D. NELSON. Detection and Mechanism of Formation of the Potent Direct-Acting Mutagen 2-Bromoacrolein from 1,2-Dibromo-3-chloropropane 286

ROCHELLE M. LONG AND LEON MOORE. Biochemical Evaluation of Rat Hepatocyte Primary Cultures as a Model for Carbon Tetrachloride Hepatotoxicity: Comparative Studies *in Vivo* and *in Vitro* 295

KENDALL B. WALLACE AND URI HERZBERG. Reactivation and Aging of Phosphorylated Brain Acetylcholinesterase from Fish and Rodents 307

EFSTATHIOS NIKOLAIDIS, BJÖRN BRUNSTRÖM, AND LENNART DENCKER. Effects of the TCDD Congeners 3,3′,4,4′-Tetrachlorobiphenyl and 3,3′,4,4′-Tetrachloroazoxybenzene on Lymphoid Development in the Bursa of Fabricius of the Chick Embryo 315

DAVID A. LIGTENSTEIN, GERRIT W. H. MOES, AND SIMON P. KOSSEN. *In Vivo* Distribution of Organophosphate Antidotes: Autoradiography of [^{14}C]HI-6 in the Rat 324

SHORT COMMUNICATION

J. H. WILLIAMS, JR., R. D. FAIRSHTER, T. R. ULICH, S. CROSBY, M. CHEN, L. ROSARIO, AND N. D. VAZIRI. Adverse Effects of (15*S*)-15-Methyl-prostaglandin E_1 in Normal and Paraquat-Exposed Rats 330

NUMBER 3, MARCH 15, 1988

WEBSTER S. S. JEE, SCOTT C. MILLER, XIAO J. LI, AND SALVATORE DESALVA. Effects of *N,N,N′,N′*-Ethylenediaminetetramethylene Phosphonic Acid on Cortical Bone Remodeling in the Adult Dog 335

ANNOUNCEMENT 509

AUTHOR INDEX FOR VOLUME 92 510

SUBJECT INDEX FOR VOLUME 92 512

CHEMICAL INDEX FOR VOLUME 92 518

Information for Authors

Toxicology and Applied Pharmacology publishes original scientific research pertaining to action on tissue structure or function resulting from administration of chemicals, drugs, or natural products to animals or humans. Manuscripts should address mechanistic approaches to physiological, biochemical, cellular, or molecular understanding of toxicologic/pathologic lesions and to methods used to describe these responses. Papers dealing with alternatives to the use of experimental animals are encouraged.

A limited number of short reviews on subjects of timely interest to toxicologists will be considered. Communications, Announcements, and Letters to the Editor are discussed below.

Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Manuscript handling fee. The Society of Toxicology has established that a manuscript handling fee of $50.00, payable to the Society of Toxicology in United States currency, must accompany the original submission of the manuscript. The name(s) of the author(s) and the title of the manuscript must be included in the check identification information. In the event that this fee cannot be met by the authors or their institution, an explanatory letter must be sent to the Editor with the manuscript. The editorial decision regarding eventual acceptance or rejection of the manuscript will be independent of the submission of the handling fee.

Submission of manuscripts. All manuscripts should be submitted to:

Toxicology and Applied Pharmacology
Editorial Office
Seventh Floor
1250 Sixth Avenue
San Diego, California 92101

Form of manuscript. Manuscripts should be submitted in quadruplicate (one original and three photocopies), in English, including four sets of figures. All copies of halftone photographs and electron micrographs *must* be glossy prints or originals; photocopies of halftones do not show sufficient detail to be used for the review process. Papers in French or German can be considered for publication: authors should contact the Editor prior to submission. All manuscripts must be typewritten, double-spaced (including references) on one side of 8.5 × 11 in. white paper with 1 in. margins on all sides. Dot matrix printers should not be used.

Page 1 should contain the article title, the names and affiliations of all authors, an abbreviated form of the title (not to exceed 40 characters including letters and spaces) and the name, telephone number, and complete mailing address of the person to whom all correspondence should be sent. The article title should be comprehensive and descriptive: proprietary names must not be used in titles, but may be identified in footnotes.

Page 2 should contain an abstract starting with the title of the paper, followed by the authors' names and reference to *Toxicology and Applied Pharmacology*; blanks should be left so that the Editor may fill in the volume and page numbers. The abstract will be limited to 250 words but must contain a concise summary of what was done, the results obtained, and valid conclusions which are drawn therefrom. It must mention the compounds or families of compounds studied, their actions, and the species of animals. It must contain important words which are used as index terms, but not proprietary names.

Example: Immunoperoxidase Localization of T-2 Toxin. Lee, S. C., Beery, J. T., and Chu, F. S. (1984). *Toxicol. Appl. Pharmacol.* **72,** 228–235.

Format. The following text sections should be used.

Introduction. State why the investigation was carried out, note any relevant published work, and delineate the objective of the investigation.

Methods. New methods or significant improvements of methods or changes in old methods must be described. Methods for which adequate reference can be cited are not to be described. In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described: if an accepted code of practice has been followed, a reference to the relevant standards should be given. Details regarding animal housing conditions should be given.

Results. Duplication between the text of this section and material presented in tables and figures should be avoided. Tabular presentation of masses of negative data must be avoided and replaced with a statement in the text whenever possible. The statement must include (a) what was done, (b) how it was done, (c) how the data were analyzed, (d) a measure of variability, and (e) the significance of the result.

Discussion. This section must relate to the significance of the work to existing knowledge in the field and indicate the importance of the contribution of this study. Needless detailed recapitulation of the results must be avoided. Unsupported hypotheses and speculation should be omitted.

References. Names of authors are to be cited in the text with the year of publication in parentheses. When there are more than two authors use the first author's name followed by *et al.* All papers mentioned in the text must be listed in the reference list and vice versa. References should be listed alphabetically typed double-spaced on a separate sheet at the end of the paper with all authors included. Journal titles should be abbreviated according to *Chemical Abstracts Service Source Index,* 1985. Note the following styles for references.

GERHART, J. M., TILSON, H. A., HONG, J. S., AND UPHOUSE, L. L. (1983). Chlordecone-induced tremor: Quantification and pharmacological analysis. *Toxicol. Appl. Pharmacol.* **66,** 234–243.

RANDALL, C. (1977). Teratogenic effects of *in utero* ethanol exposure. In *Alcohol and Opiates* (K. Blum, Ed.), pp. 91–107. Academic Press, New York.

COLE, R. J., AND COX, R. H. (1981). *Handbook of Toxic Fungal Metabolites.* Academic Press, New York.

Footnotes should be identified in the text by superscript Arabic numerals and cited consecutively throughout the paper. All footnotes should be listed in order typed double-spaced on a separate sheet. Proprietary names of substances and names and addresses of suppliers should be identified in footnotes. If the paper has been presented orally in whole or in part, the date, and occasion should be included in a footnote.

Tables must be typed double-spaced on a separate sheet with the title typed directly above the table. Do not use abbreviations in the title. The title and footnotes must contain all the information necessary to understand and interpret the table without reference to the text. Tables must be numbered consecutively with Arabic numerals. Footnotes to tables should be identified by superscript lowercase letters ^{a,b} etc., and placed at the bottom of the page containing the table. Letters should be assigned to table footnotes alphabetically in order of appearance as the table is read *horizontally*, not vertically.

Figures should be numbered consecutively with Arabic numerals. All legends are to be typed consecutively on a separate sheet. All figures should be planned to fit the proportions of the printed page (5.5 × 8 in.; column width, 2.5 in.); wherever possible, figures will be reduced to single-column width. Lettering on the original figure should be large enough to be legible after reduction of the figure to single-column width (approximately 50 to 60%). *Differences in type size within a single figure should be no more than approximately 15%*. Standard mechanical lettering sets should be used. Characters should be approximately 3/16-in. high (Leroy lettering size 140). *In addition, symbols used to identify points within a graph should be large enough that they will be easily distinguishable after reduction.* Graphs should be plotted with black India ink on white paper no larger than 8.5 × 11 in. Grid lines that are to show must be inked in black.

All copies of halftone photographs and electron micrographs *must* be glossy prints or originals; photocopies of halftones do not show sufficient detail to be used for the review process. Photographs must be kept to a minimum. Photographs should be glossy prints (5 × 7 or 8 × 10 in.). Overlays indicating the parts of the electron micrographs that are to be emphasized must be used. Electron micrographs should be submitted not larger than 6.5 × 4.5 in. Magnifications should be indicated in the figure legends. Illustrations in color can be accepted only if the authors defray the cost.

Identify all figures on the back, in *pencil,* with authors' names and figure number, and indicate the TOP.

Index terms suitable for use in the subject index must be submitted on a separate sheet. The list should include chemical name, generic name, common name, and may include proprietary name of each important substance used in the experiments. It should also include biological activity of each substance investigated. Terms should elucidate important relationships.

Nomenclature. For styling of isotope, enzyme, and biochemical nomenclature, consult the Information for Authors of the *Archives of Biochemistry and Biophysics.*

Abbreviations. Units will be in general accordance with the International System (SI) as adopted by the 11th General Conference on Weights and Measures. Periods are not used after abbreviations (note exceptions, e.g. in. for inches).

Common abbreviations to be used in this journal are:

m	meter	ppm	parts per million
cm	centimeter	cpm	counts per minute
mm	millimeter	dpm	disintegrations per minute
μm	micrometer	sc	subcutaneous
nm	nanometer	ic	intracutaneous
kg	kilogram	im	intramuscular
g	gram	ip	intraperitoneal
mg	milligram	iv	intravenous
μg	microgram	po	oral
ng	nanogram	LD50	median lethal dose
ml	milliliter	LC50	medial lethal concentration
μl	microliter	Hz	hertz
mol	mole	°C	centigrade
M	molar	sec	seconds
mM	millimolar	min	minutes
μM	micromolar	hr	hours
N	normal	SD	standard deviation
Ci	Curie	SE	standard error
$\bar{x}$	mean	TLV	threshold limit value

Reprints. A reprint order form will accompany the proofs. Fifty reprints of each article (without covers) are supplied free of charge.

Communications. Toxicology and Applied Pharmacology will accept a limited number of brief reports of work that has progressed to the stage at which it is considered that the science of Toxicology would be advanced if the results were made available as soon as possible. These reports will be designated "Communications." Authors should submit short papers for this category of publication only when they believe that the rapid communication of the results is of the utmost importance to other investigators. The manuscript must be submitted in duplicate and conform strictly to the form and style of the journal. The length must be such that it will require no more than four pages in the present format of the journal, approximately 2500 words total.

Letters to the Editor. Letters to the Editor will be accepted for publication subject to Editorial Board approval, provided that the content deals with papers published in *Toxicology and Applied Pharmacology* and that the comments are of scientific value. Letters should be received within two months of mailing of the journal and should be no longer than 250 words. Introduction of new data will not be permitted. Each letter will be submitted to the author of the original paper in order that any reply may be published simultaneously with the letter.

Announcements: Toxicology and Applied Pharmacology will accept for publication announcements of interest to toxicologists such as notices of society meetings, symposia, or other matters.
